

## Rf security systems

Radiofrequency security door Single-bearing (RF004)

### Product description

1. Product name.: Radiofrequency security door RF003 Crystal glass door.
2. Product specification: 150 x 40 x 10 cm
3. Product color: transparent .
4. Alarm number display function (optional).
5. EAS electronic eye connection function (optional).
6. Environmental interference display function (optional).
7. DSP technology application.
8. Multiple modulation frequency and detection sensitivity for choice.
9. Can choose detection movement or static label.
10. Can adjusting alarm acousto-optic ring number and time.
11. Almost transparent detection antenna, strong adaptability and high sensitivity.
12. Door distance: soft label can reach 1.5 M and easy hard tags can be up to 2.2 M.

Crystal glass door of guard against theft is mainly used in a shop stores have broader area such as high-grade brand clothing store, high-grade leather bag boutique, crystal anti-theft antenna in the ideal environment to use and easy security label can reach 2.5 meters. Crystal glass door not only appearance good-looking, but also on the structure is superior to the aluminum alloy antenna frame, and the antenna's wiring and line material relevant, alarm when receiving antenna on the face of the LED a bright red, store mount connects the glass antenna frame reduces the similar aluminium alloy antenna give a person a kind of feeling of oppression, Japan imported organic glass a long time not only not become yellow, also won't deformation!
